

Recommendation Letter

26 June 2026

To Whom It May Concern,

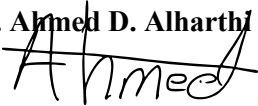

I am pleased to recommend Norah M. Alkabkabi, whom I had the opportunity to teach in the Software Maintenance and Configuration course.

Norah demonstrated a solid grasp of software maintenance principles and the necessary practices for supporting reliable and sustainable software systems. She demonstrated strong organizational skills, thorough analysis of software changes, and an ability to handle technical tasks with precision and accountability.

Her commitment to learning and professional attitude were evident throughout the course. I believe Norah has the potential to continue developing as a software engineering professional and to contribute effectively to future projects.

Sincerely,

Dr. Ahmed D. Alharthi

Assistant Professor of Software Engineering
College of Computing
Umm Al-Qura University
Makkah, Saudi Arabia
