PROJECT INTRODUCTION

UQU'S CAFETERIA SYSTEM

Amjaad Hawsawi 444003283

Noorah Mohammed 444003676

Weam Rashed 444015412

- What is the problem?

We noticed that both students and faculty members at Umm Al-Qura University find it difficult to get their orders from the university cafeterias, and that is for several reasons, including: the long waiting line and short break times, and therefore they are usually unable to get their morning coffee or to eat breakfast in time.

- Why it's a problem?

Because this leaves students and faculty members with only two options: either being late for class or remaining hungry throughout the day, both of which lead to poor productivity and concentration and thus a lower academic standard.

- What are the main parameters of the solution?

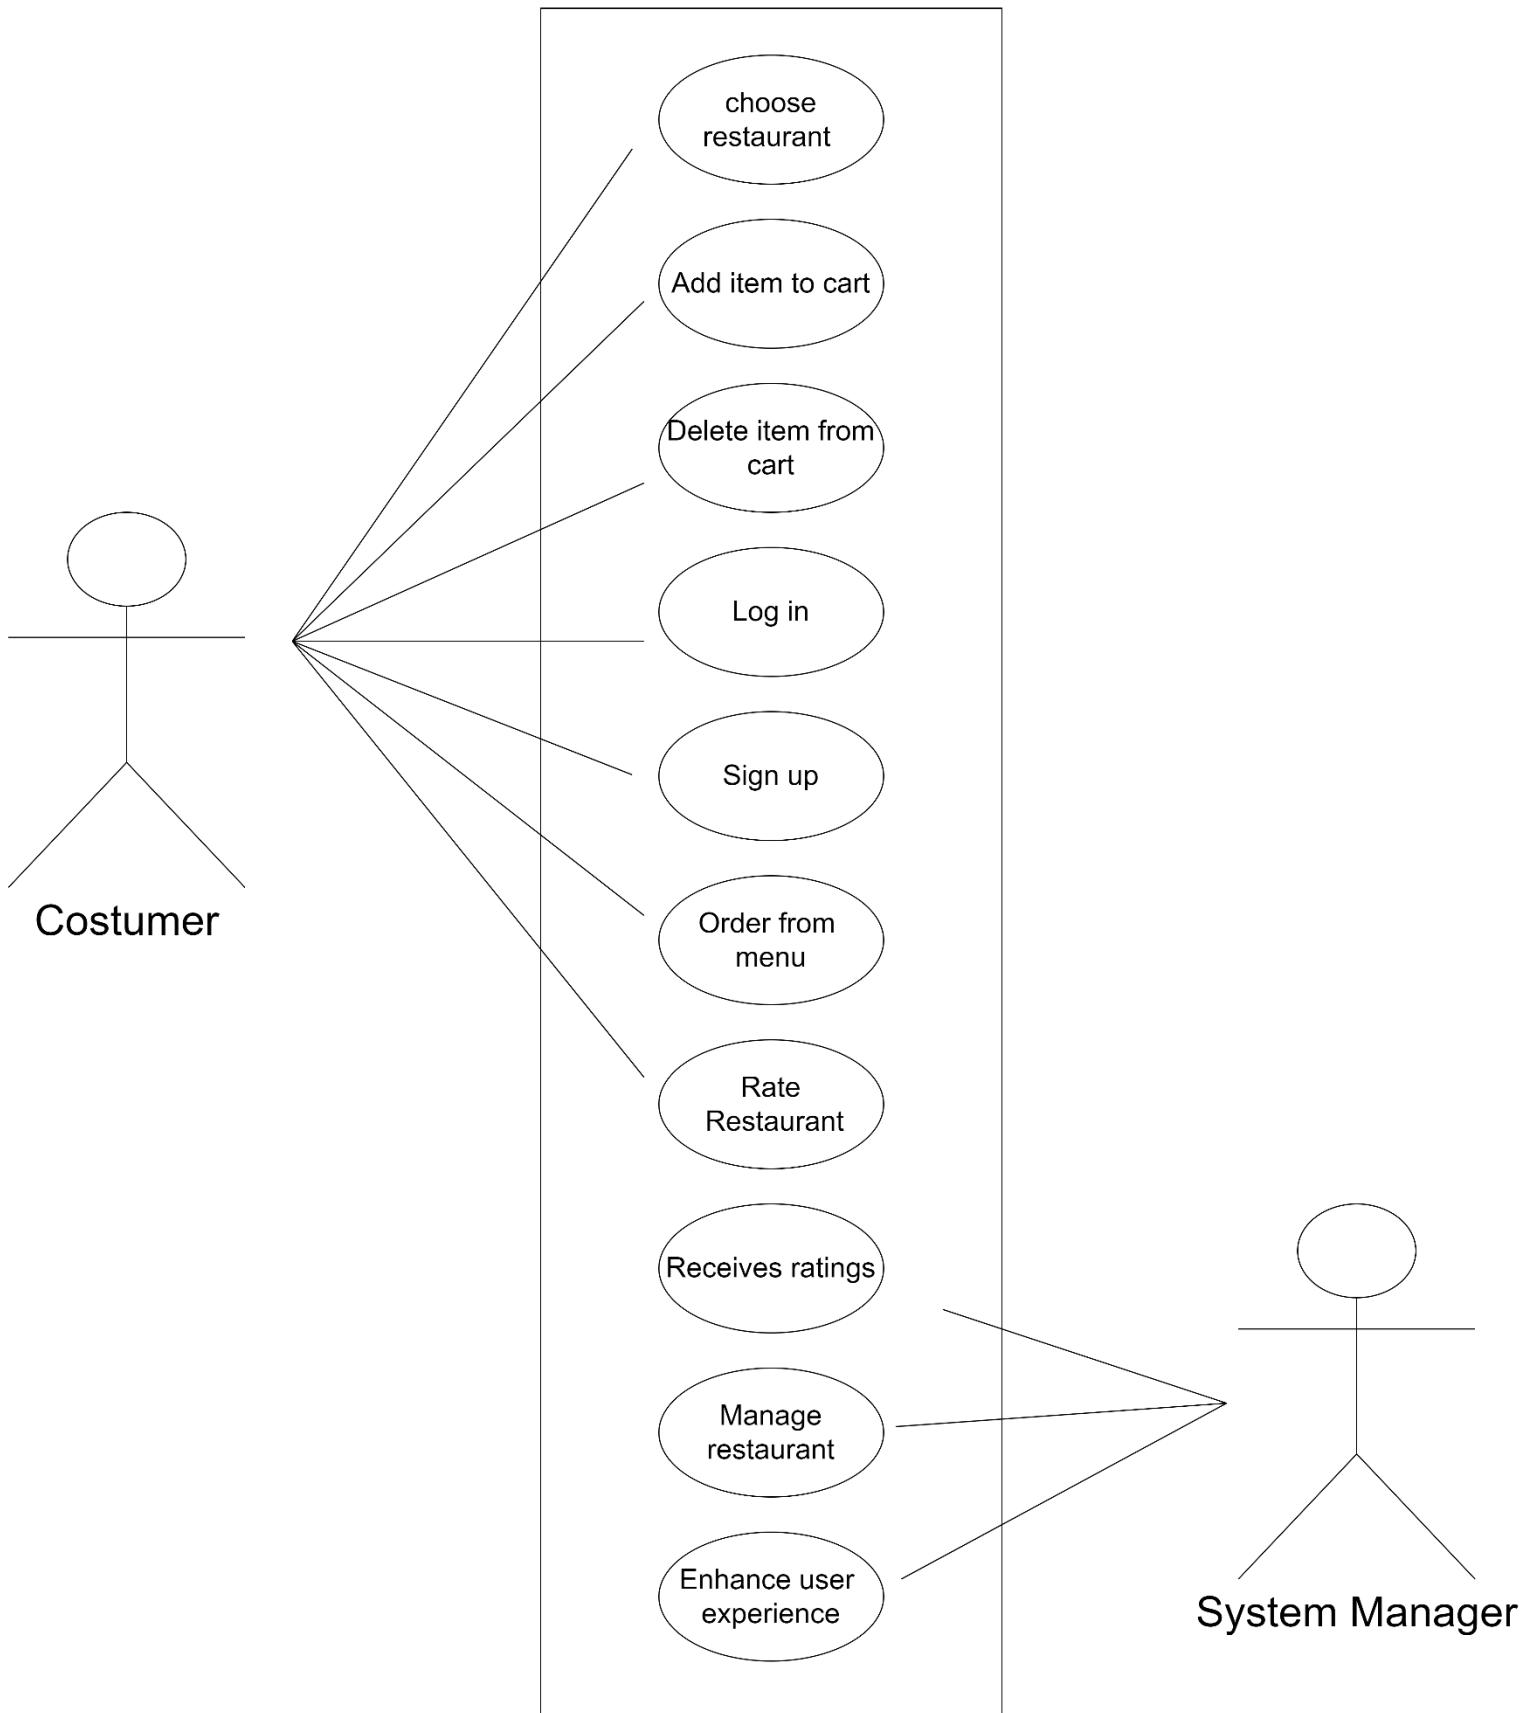

- One of the most important features included in the system is the ability to order from any cafeteria at the university via mobile phone, and thus the order is received with the possibility of prepayment.

- One of the non-technical features included is the high security of the payment process via the application.
- The application shall help the students get their order swiftly and be in class right on time.
- The application shall be compliant with users expectations and hopes which are to save time and effort and ease the process of finding the right place to eat.

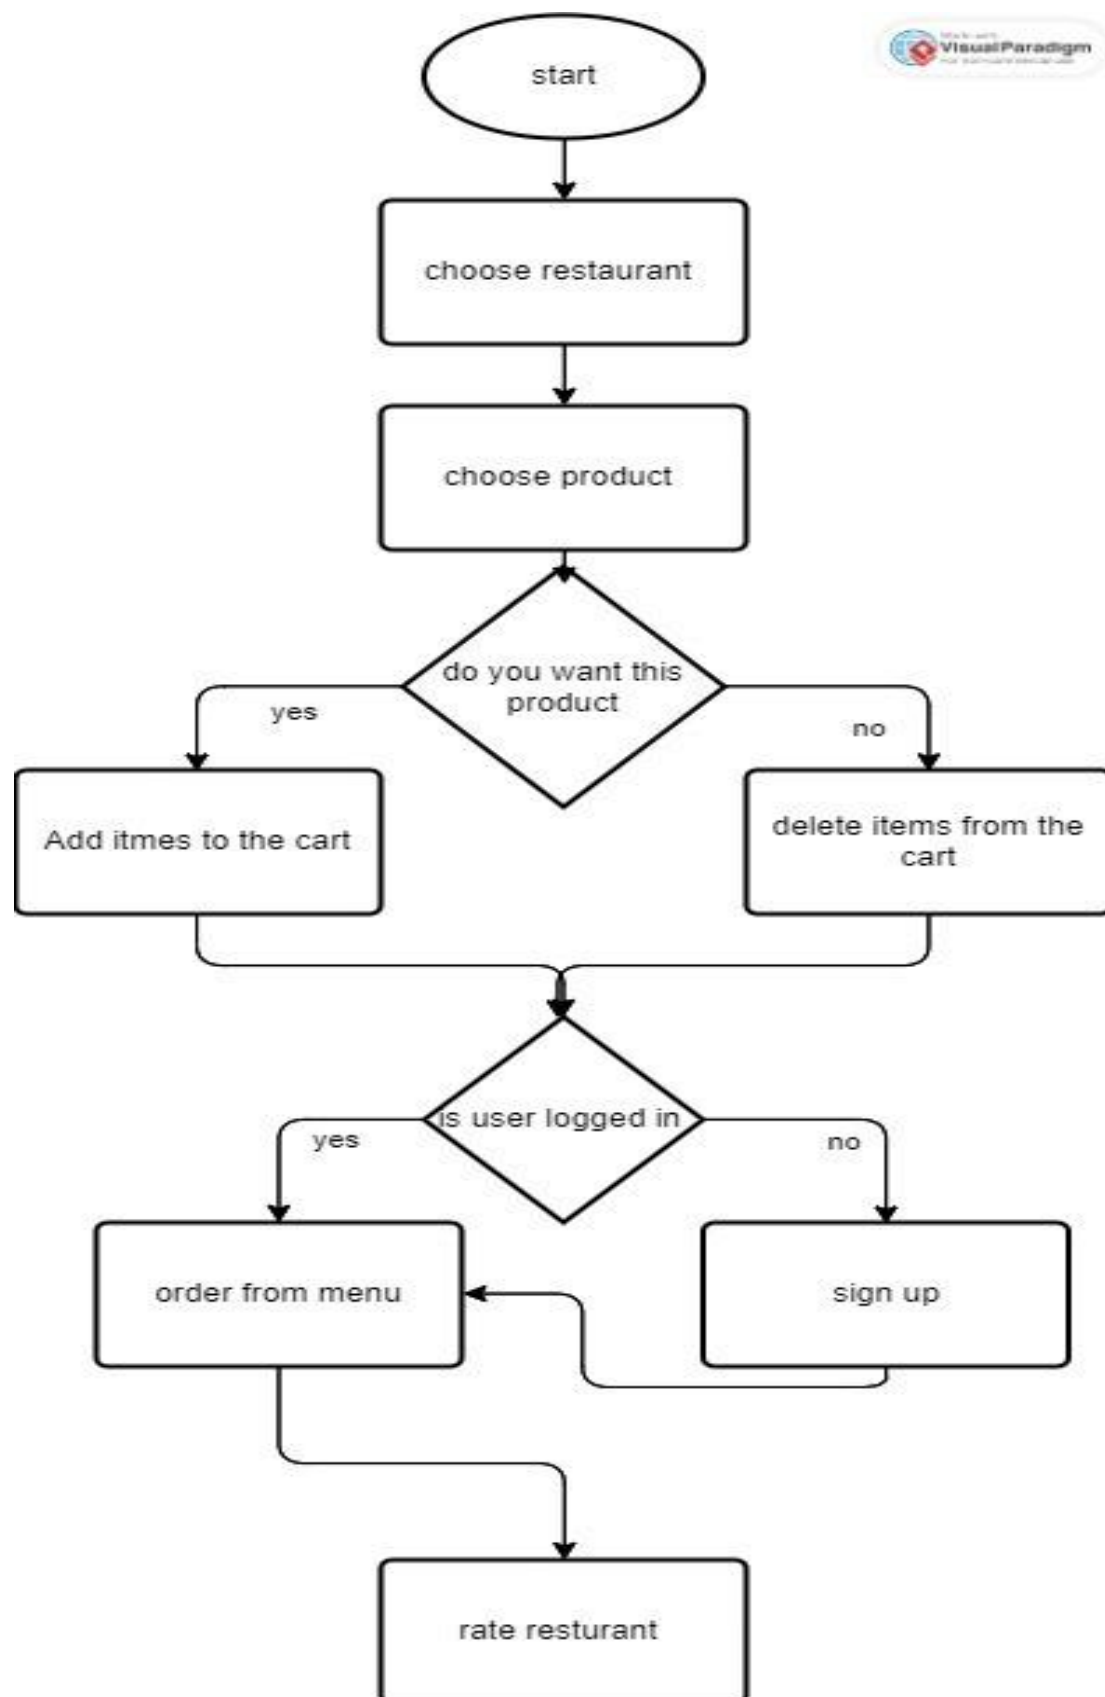

- Who Are the Current Competitors in the Market?

There are several competitors from outside the university alike hungerstation that provide students and teachers with breakfast, coffee and lunch, but there is no such application for the cafeterias of UQU university only.

Sign up page : Weam

A mobile application sign-up page with a light purple background. At the top is an orange header bar containing a back arrow icon on the left and the text "Sign up" in the center. Below the header, three light gray rounded rectangular input fields are stacked vertically. The first field contains an envelope icon and the text "Email". The second field contains a person icon and the text "User Name". The third field contains a padlock icon and the text "Password". At the bottom of the form is a large orange rounded rectangular button with the text "Sign Up" in black.
