I Project Specification

I.1 Project Summary

The goal of the Twine website is to promote and provide access to their exclusive color analysis services to help customers unlock their true beauty potential and enhance their personal style through the discovery of their optimal color palette.

1. Twine Salon offers a range of color analysis services, including:

- Full Color Analysis
- Hair Color Analysis
- Makeup Color Analysis
- Jewelry Color Analysis

2. Twine provides a "Discover Your Seasonal Color Palette!" quiz that helps customers find out which colors suit them best.

3. The website features positive customer testimonials about the effectiveness and value of Twine's color analysis services.

4. Twine has a team of color analysis experts, including a Color Analyst, Color Consultant, Color Stylist, and Color Specialist, who are passionate about helping clients discover their perfect colors.

I.2 Primary audience

the primary audience are individuals, likely women, in Saudi Arabia who are interested in discovering their optimal color palette and using that information to enhance their appearance, style, and overall sense of confidence in their personal aesthetic.

I.3 Navigational Structure of Our Website

1. Main Page

- Acts as the central hub of our website.
- Links to the Blog Page, About Us Page, Our Quizzes Page, and Booking Page.

2. Blog Page

- Contains articles related to various topics.
- Links to:
 - the Season article.
 - Perfect Jewelry Color article.

3. About Us Page

- Provides information about our company

4. Our Quizzes Page

- Offers interactive quizzes for users.
- Links to:
 - Find Your Seasonal Color quiz.
 - Find Your Perfect Jewelry quiz.

5. Booking Page

- Allows users to make bookings or appointments.
- After booking, users are redirected to the:
 - Thank You Message Page, confirming their booking.

We used two videos as a wallpaper first is the Background video for all pages:

HTML:

```
<video src="Wallpaper/1722881-uhd_3840_2160_25fps.mp4" muted loop autoplay></video>  
<div class="overlay"></div>
```

CSS:

```
/*video setting*/  
  
body {  
  margin: 0;  
  padding: 0;  
}  
  
video {  
  position: fixed;  
  top: 0;  
  left: 0;  
  width: 100%;  
  height: 100%;  
  object-fit: cover;  
  z-index: -1; /* Ensure the video stays behind other content */  
}  
  
.container {  
  position: relative;  
  z-index: 1; /* Ensure content appears above the video */  
}
```

Second is the flower video in the main page:

HTML:

```
<div class="video-container">  
  <video src="wallpaper/rose.mp4" autoplay loop muted></video>  
</div>
```

CSS:

```
.video-container {  
  position: absolute;  
  top: 0;  
  left: 0;  
  width: 100%;  
  height: 100%;  
  overflow: hidden;  
  z-index: -1;  
  height: auto;  
  min-width: 100%;  
  min-height: 100%;  
  position: absolute;  
  top: 50%;  
  left: 50%;  
  transform: translate(-50%, -50%);  
}
```

We have also used a lot of pictures throughout the website, for example the code for the pictures in 'about us' page:

```

```

1.4 programming tools we used

CSS and HTML, JavaScript

We applied it using Visual studio code.

3. Website organization

The organization of The Twin Salon website is designed to prioritize user experience and make it easy for customers to navigate, engage with the salon's offerings, and ultimately book services.

Home Page: The home page is the entry point for users, so it is designed to be visually attractive and provide quick access to key features.

Simplified booking process: Enabling customers to book appointments directly through the website improves ease and convenience and reduces obstacles in the booking process, This simplifies salon operations.

Interactive Quizzes: Engaging customers in quizzes or other interactive elements encourages them to explore the Site and Services further, This can increase customer engagement and likelihood of booking.

Articles Section: Placing an article section on the website provides clients with valuable insights and advice from salon experts.

How the information on each page is placed?

Booking page

1. Page Title: The “Booking Page” title is placed prominently at the top, clearly indicating the purpose of the page.
 2. Personal Information: The form begins with personal information fields including “First Name,” “Last Name,” and “Mobile Number.”
 3. Email: An email field is included for correspondence and sending reservation confirmations and other notifications.
 4. Date: A date picker is located next to the “Date” field, allowing users to easily select the date of their appointment.
 5. Select Time: The Select Time menu allows users to choose a time that suits their schedule.
 6. Select Service: There is another drop-down menu titled “Select Service” that asks users to select the type of service they want.
 7. Submit Booking: The “Submit Booking” button is a clear call to action, prominently placed at the bottom of the form.
- Reset: There is also a Reset button next to the submit button, allowing users to clear all fields and start over if necessary.

Quizzes page

1. Skin Tone: Users can select their skin tone from a dropdown menu.
2. Hair Color: Another dropdown allows users to choose their hair color.
3. Eye Color: Users can select their eye color from a dropdown menu.
4. Natural Lip Color: This dropdown menu lets users select their natural lip color.
5. Submit: The “Submit” button processes the input to provide a result or recommendation.

Articles page

There is a navigation bar called “Our Articles”. This article includes explain to various articles such as “Yourself and the Seasons” and “Your Ideal Jewelry Color.” Each is clickable, providing easy access to specific content. The user experience

- Helping customers better understand their color analysis and conveniently book appointments
- Providing a seamless and efficient experience for accessing and enjoying the salon's offerings
- Increasing customer satisfaction, loyalty, and the likelihood of repeat business

3. TESTING

We tested the website components individually at first, ensuring that each component worked as it should, then we performed integration testing as we gradually combined components and tested the combinations.

1. Navigated through the website to ensure ease of use and the connecting of website pages.
2. As for the booking we created multiple tests booking to verify functionality and the confirmation messages.
3. We input various amounts of data to test the quizzes we provide in our website to ensure they were engaging correctly and provided accurate suggestions.
4. We reviewed the article included in our website to ensure that the text layout as it should be.
5. Checking the links of each web page and the design of each page matches the other perfectly.

We tested the web in various stages of the web development process such as:

1. After inserting a component to a page
2. After linking pages together
3. After inserting media (images, video, sounds)
4. After inserting a CSS code
5. After inserting a JavaScript code

4. CONCLUSION

Working on this project has evolved our website design skills significantly and taught us to work as a team under pressure and showed us the importance of communication and teamwork to achieve the project goals.

Through this project we encountered various challenges which helped us develop problem-solving abilities and adaptability. Designing the website with the user in mind became a priority we wouldn't be able to think of when doing the usual assignments and it opened our mind to many different possibilities we wouldn't be able to think about.

Overall, this project served as a valuable interesting experience, leaving us with skills and insights for our future endeavors.
